

What if you can have all of the benefits of virtual credit cards but not have to abandon your American Express program?

You can with Tradeshift Go.

In addition to being FREE & EASY to use, Tradeshift Go offers American Express users a more efficient, secure, transparent, and scalable American Express experience (all while getting the same rebates, rewards and cash flow benefits you love).

BUT What are the benefits of using virtual cards?

Security

Do you find that isolated payment streams for card-on-file situations, one-off vendors, and individual employees are time consuming and monotonous?

✓ **With Tradeshift Go, it's quick, easy and scalable**

If your card information was compromised with any of your vendors, can you imagine how much disruption it causes to your business? We've all heard of the horror stories it causes where companies wait days and even weeks for a replacement physical card. And when they finally receive it, being subject to updating every merchant with new details.

✓ **Tradeshift Go allows you to cancel and replace a card with a new unique card number in just seconds, with no disruption to your other payment streams. You can avoid this situation altogether. This works even if there is a fraudulent transaction on one of the cards.**

Reconciliation

Do you dread the end of the month where you're scrambling to reconcile hundreds and even thousands of transactions across your card program?

✓ **Without issuing more physical cards, Tradeshift allows you to quickly and easily segment your expenses by team, employee, merchant, even Cost Center, General Ledger, etc, or all of the above leading to even more transparency to who is spending what and where!**

- Tradeshift Go has the ability to capture accounting codes at the individual virtual card level on the front end of the purchasing process

- These accounting codes remain with the transactions through the entirety of the reconciliation process, preventing the end of month responsibility of tying credit card expenses to the right budgets

- Downloadable as CSV from TS Go with Business cards

- With a Corporate or PCard, we can map this enhanced remittance data to flow back to your American Express Statement for further integration options from there.

Spend Management

Have you considered how to expand your reach, but concerned with not having control of what's being charged and by who?

✓ **Tradeshift Go enables organizations to be proactive rather than reactive when it comes to approving credit card expenses, unlike the traditional expense approval model**

- The requisition and approval flow within Tradeshift Go allows budget owners to have full transparency and control via upfront approvals
- Full visibility into who is spending what and where, with a full audit trail associated to eliminate rogue expenses
- Optimize rebates by consolidating employee expenses to your American Express business, corporate or purchasing card program
- Tailor your organizational structure and approval hierarchy to your needs by quickly adding and removing users, creating customizable approval hierarchies, etc.

Support

Does this sound daunting and complicated to you? Are you worried that this sounds like more work and the 'juice is not worth the squeeze'?

✓ **Tradeshift Go has a team of experts at your disposal. Your designated account manager will take a tailored approach in setting up and managing your account for as long as you're a user. It is our goal to take as much work off your plate and make your experience as "touch free" as possible. We want you to use your time to grow your business.**
